

COMPARATIVE SIZE CHART

ENGLISH VERSUS AMERICAN SIZES: To convert an English Size to American, add 1½ sizes, thus size 4 is marked size 5½

SIZE GROUP:
Easy method of converting English sizes into French point. English size "5" adult's (10") is practically the same as 38 French point.

$$\text{French Points} = \frac{\text{Eng. sizes in inches} \times 38}{10}$$

METRIC SCALE:
This is another scale used in Europe with one size equal to 1 cm.

English SCALE:
Starts with Child's size "0" representing a shoe insole length of 4", each full size interval is 1/3", or 8.4mm. The English size scale is divided into (1) a Children's size ranging from "0" to "13" (4"-8½") and (2) an Adult's scale ranging from "1" to "12" (8 2/3"-12 1/3"). Half sizes are usually made.

AMERICAN SCALE:
Starts with Child's size "0" representing a shoe insole length of 3 1/12", each size interval is 1/3" similar to the English size stick: each size is therefore 1/12" shorter than its English equivalent. Half sizes are made.

FRENCH SCALE:
This continental size unit is equal to 6.6mm. The size scale begins at 0cm. and continues without a break up to the largest sizes. Half sizes are generally not made.

JAPANESE SCALE:
Used exclusively by Japanese footwear export trade. Each size equals 24mm 1/4 and 1/2 sizes are made. Size 9 is equal to 8 1/2 inches.
